

JEET THAKKAR

Software Engineer | Full-Stack Developer | Java | Node.js | React | Generative AI

Canada | +1 (382) 342 1143 | jeetthakkar2612@gmail.com

GitHub: github.com/jeet7122 | Portfolio: jeet7122.github.io | LinkedIn: linkedin.com/in/jeetthakkar

SUMMARY

Software Engineer with hands-on experience building full-stack and backend applications using Java, Spring Boot, ReactJS, Node.js, PostgreSQL, and REST APIs. Experienced in developing scalable microservices, cloud-native applications, and event-driven systems using Docker, Kafka, and modern development practices. Strong foundation in software engineering, data structures, algorithms, Git-based workflows, and Agile development. Passionate about building reliable, user-focused applications and continuously learning new technologies.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL

Frontend: ReactJS, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, REST APIs, Microservices

DevOps & Cloud: Docker, Kubernetes, Azure, GitHub Actions, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Redis

Messaging: Apache Kafka, RabbitMQ

Security: Spring Security, OAuth2, JWT

Software Engineering: Git, Agile, Scrum, Unit Testing, Integration Testing, JUnit, Mockito

EXPERIENCE

Freelance Software Developer

Remote | 09/2025 - Present

- Developed full-stack web applications using Node.js, React.js, PostgreSQL, and Azure services, enabling clients to automate business processes and improve operational efficiency.
- Designed REST APIs, database schemas, and analytical workflows for processing and validating business data, improving scalability, maintainability, and reporting capabilities.
- Established CI/CD pipelines, containerized deployments with Docker, and performed testing and debugging, resulting in reliable releases and reduced deployment overhead.

PROJECTS

VIDEO STREAMING PLATFORM | Java, Spring Boot, PostgreSQL, Kafka, Docker

GitHub: https://github.com/jeet7122/streaming_platform

- Built a microservices-based video streaming platform using Spring Boot, Kafka, PostgreSQL, and Git, enabling independent scaling of User, Video, Like, and Comment services.
- Implemented JWT-based authentication and API Gateway routing, securing service communication and reducing unauthorized access.
- Developed event-driven workflows using Apache Kafka and validated business logic through JUnit unit testing, improving system reliability and supporting asynchronous processing across services.

GOLD MARKET ANALYTICS PLATFORM | Python, FastAPI, Pandas, Numpy, Scikit-learn, Next.js, TypeScript

GitHub: https://github.com/jeet7122/gold_market_analytics_platform

- Built a full-stack prediction platform using Next.js, TypeScript, FastAPI, PostgreSQL, and Scikit-learn that analyzes historical gold market data and generates probability-based forecasts for next-day price movement.
- Engineered machine learning pipelines using Scikit-learn and time-series features, generating probability-based predictions for next-day gold price movement (Up/Down).
- Developed interactive dashboards and REST APIs using Next.js and FastAPI, providing real-time visualization of market trends, volatility indicators, and prediction insights.

RAG BASED RESUME OPTIMIZER | Python, FastAPI, PostgreSQL, pgvector, LangChain, OpenAI/Gemini, Docker

GitHub: https://github.com/jeet7122/ats_resume_intelligence_platform

- Developed an AI-powered ATS resume scanner using RAG architecture, enabling semantic matching between resumes and job descriptions with contextual feedback.
- Built vector search pipelines using pgvector, embeddings, and LangChain, improving retrieval accuracy for skill and experience evaluation.
- Automated resume scoring and gap analysis through LLM-powered workflows, reducing manual screening effort and generating actionable recommendations.

EDUCATION

Diploma in Computer Programming - Graduated 2026

St. Clair College - Zekelman School of Information Technology

Coursework: Object-Oriented Programming (Java), Advanced Java Programming, Data Structures & Algorithms, Database Design & SQL, Software Engineering, Web Development, Enterprise Application Development, Systems Analysis & Design, Cloud Computing Fundamentals

CERTIFICATIONS

- Udemy – Full Stack Development Boot-Camp | 02/2026
- Forage – JP Morgan Chase & Co – Software Engineering Simulation | 05/2026
- IBM - Introduction to Cloud | 05/2026
