

JEET THAKKAR

Software Engineer | Microsoft Certified Azure AI Apps & Agents Developer | Full-Stack | Java | Spring Boot | Azure AI

Canada | +1 (382) 342 1143 | jeetthakkar2612@gmail.com

GitHub: github.com/jeet7122 | Portfolio: jeet7122.github.io | LinkedIn: linkedin.com/in/jeetthakkar

SUMMARY

Software Engineer with hands-on experience building scalable full-stack applications, backend services, microservices, and AI-powered cloud solutions using Java, Spring Boot, React, Node.js, PostgreSQL, Docker, Apache Kafka, AWS, and Azure. Microsoft Certified: Azure AI Apps and Agents Developer Associate (950/1000), with experience developing intelligent applications using Azure AI services, AI Agents, Generative AI, LangChain, Retrieval-Augmented Generation (RAG), vector search, and Large Language Models (LLMs). Passionate about designing secure, distributed systems and building scalable, production-ready software that solves real-world problems.

SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL

Backend: Spring Boot, Node.js, FastAPI, REST APIs, Microservices

Frontend: ReactJS, Next.js, HTML5, CSS3, Tailwind CSS

DevOps & Cloud: Docker, Kubernetes, Microsoft Azure, Git, GitHub Actions, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Redis

Messaging: Apache Kafka, RabbitMQ

Security: Spring Security, OAuth2, JWT

AI & Cloud AI: Azure AI Services, Azure AI Foundry, AI Agents, Generative AI, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Search, LLM Integration

Software Engineering: Object-Oriented Programming (OOP), SDLC, Agile, Code Reviews, Unit Testing (JUnit), Selenium, Postman

EXPERIENCE

Freelance Software Developer

Remote | 09/2025 - Present

- Developed responsive full-stack web applications using React, Node.js, PostgreSQL, and REST APIs, delivering scalable cloud-ready solutions while collaborating with clients to gather requirements and implement user-focused features.
- Implemented serverless event-driven workflows using Azure Functions for contact form processing and automated email notifications, eliminating the need for dedicated backend infrastructure.
- Automated deployments using GitHub Actions and Vercel while following version control and software engineering best practices to improve release reliability and streamline software delivery.

PROJECTS

VIDEO STREAMING PLATFORM | Java, Spring Boot, PostgreSQL, Kafka, Docker

GitHub: https://github.com/jeet7122/streaming_platform

- Designed and developed a scalable microservices-based video streaming platform using Java, Spring Boot, PostgreSQL, Apache Kafka, JWT Authentication, and API Gateway, implementing distributed system design & asynchronous event-driven communication.
- Designed and implemented secure REST APIs with JWT authentication and API Gateway routing for reliable communication across multiple services.
- Built asynchronous event-driven pipelines using Apache Kafka and JUnit testing to improve reliability, scalability, and fault tolerance across distributed microservices.

AI CLAIM REVIEW AGENT (HackerRank Orchestrate Hackathon 2026) | Python, FastAPI, LangChain, Gemini/OpenAI, Vision AI

GitHub: <https://github.com/jeet7122/hackerrank-orchestrate-hackathon-2026>

- Developed a production-style multimodal AI Agent that automates insurance claim triage using Large Language Models (LLMs), FastAPI, LangChain, and Retrieval-Augmented Generation (RAG) to analyze conversations, uploaded evidence, policy documents, and user history.
- Implemented explainable AI workflows that generated evidence-backed decisions while improving transparency, reasoning quality, and decision accuracy.
- Implemented Responsible AI safeguards including prompt injection detection, adversarial input validation, and evidence consistency checks to improve system integrity.
- Architected a modular pipeline following separation-of-concerns principles, including data loaders, image analysis, evidence evaluation, risk detection, decision services, and structured report generation.

AI-Powered RESUME OPTIMIZER | Python, FastAPI, PostgreSQL, pgvector, LangChain, OpenAI/Gemini, Docker

GitHub: https://github.com/jeet7122/ats_resume_intelligence_platform

- Built vector search pipelines using embeddings, pgvector, and semantic search techniques to improve contextual information retrieval and ranking accuracy.
- Built vector search pipelines using pgvector, embeddings, and LangChain, improving retrieval accuracy for skill and experience evaluation.
- Automated resume scoring and gap analysis through LLM-powered workflows, reducing manual screening effort and generating actionable recommendations.

EDUCATION

Diploma in Computer Programming - Graduated 2026

St. Clair College - Zekelman School of Information Technology

Coursework: Object-Oriented Programming (Java), Advanced Java Programming, Software Engineering, Enterprise Application Development, Systems Analysis & Design, Data Structures & Algorithms, Database Design & SQL, Web Development, Cloud Computing Fundamentals.

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (950/1000) (July 2026)
- Microsoft AI Skill Fest 2026 (June 2026)
